Our Statement of Philosophy

The gifted education program in Staunton City Schools is based on the school division’s philosophy of rigorous, dynamic, and reflective instructional programs for all students.

Staunton City Schools is committed to identifying and serving those students in kindergarten through grade twelve who demonstrate high levels of accomplishment, or who show the potential for higher levels of accomplishment, when compared to others of the same age, experience, or environment.

For gifted students, this philosophy of empowerment through skills and knowledge demands curricular experiences designed to enhance the students’ thinking abilities, academic proficiencies and special talents.

The Staunton City School Board is committed to a policy of nondiscrimination with regard to race, color, sex, age, religion, disability, national origin, or status as a parent. This attitude will prevail in all of its policies concerning staff, students, educational programs, and services, and individuals and entities with whom the Board does business.

Gifted students reach their academic potential through a dynamic curriculum that deals with complex issues, higher order thinking, and depth of learning.
