

Yes — you *do* have vision benefits

## And they come with choices and savings

### Make the most of *all* your benefits

Are you thinking you'll skip an eye exam this year because you don't have a vision plan?

Not to worry! Your Aetna medical plan helps you take care of your eyes. And pay a little less while you're at it. With the plan, you get Aetna Vision<sup>SM</sup> benefits, which include:

- Insurance coverage for a routine eye exam, refraction
- Access to Aetna vision discounts, so you can save on prescription glasses, contact lenses and more

**Here's what to do:** Before making any appointments, log in to your member website to find EyeMed locations. [www.aetna.com](http://www.aetna.com).

**For an eye exam:** Show your member ID card at your visit. The doctor's office checks for eye exam coverage. Call the number on the back of your card with any questions. Get your routine eye exam and it is covered at 100%. The EyeMed doctor bills Aetna for the exam, no claim form needed.

### Save with Aetna vision discounts

This nice feature isn't insurance. But it is a convenient way to pay less. To use it, you just have to visit an eye care location in the EyeMed Select Network.

And that's pretty easy. Some of your favorite chains participate. Like Sears Optical<sup>®</sup>, JCPenney Optical, Target Optical<sup>®</sup>, Lenscrafters<sup>®</sup> and Pearle Vision<sup>SM</sup>. So do many local eye care offices.

**Here's what to do:** Make sure to ask if you can use Aetna vision discounts whenever you're buying eyewear.

### Discounts on LASIK laser eye surgery

Thinking about a more permanent solution for correcting your eyesight? LASIK surgery savings are also available.

You need to call 1-800-422-6600 before scheduling an appointment. And if you go for the surgery, you pay 100 percent of the discounted LASIK fee.
