AccuTec Blades, Inc.
One Razor Blade Lane
Verona, VA 24482
540.248.8000

Title: Microtomy Associate
Location: Verona, VA
Department: Industrial / Medical Operations

Summary:

Accutec Blades, Inc. is seeking a Microtomy Associate to work on specialty microtome products and be part of the team that brings the best possible quality to our customers. Microtomy is a method for the preparation of very thin sections of materials such as wax, minerals, and biological tissues for examination by a doctor, histologist, or anyone with a microscope. Your skills will be needed to test and qualify microtome cutting blades as well as provide support to the engineering and R&D departments in developing new products. Extensive training will be provided for the right candidate to ensure your success.

Responsibility:

- Prepare blank wax blocks for microtome sectioning of a variety of samples including regular and cryo media.
- Select microtome blades for testing in a manufacturing setting. Understand and follow proper and safe blade handling techniques
- Microtomy - preparation of precision cuts (sections) using a microtome. Exceptionally sharp blades are provided to facilitate optimal sectioning
- Document blade performance and characteristics
- Demonstrate initiative, insight, and judgment in making decisions related to job performance.
- Use knowledge, deductive skills, and judgment to find and resolve potential sources of errors and other problems, identify potential improvements, and work closely with engineering to continuously improve processes and products.
- Maintain work area and quality documentation.
- Not subject to occupational exposure to blood or body fluids.

Qualifications:

- Must be able to prioritize multiple tasks.
- High attention to detail and well organized.
- Outstanding written and oral communication.
- Skills are essential along with the ability to interact at different levels of the organization.
